We promise never to rent, sell or giveaway your personal information. Ever.

Party Idea:

Streamers. Games. Chocolate cake. The recipe for a usual birthday party, right? Well, almost as easily you can create a movie-themed birthday party that your kids and their friends will be talking about for weeks.

Step 1: Select their favorite big-screen movie as the theme send out the invitations. Be creative and send out invites that look just like a movie ticket stub.

Step 2: Create a movie theater experience right in your home – pin a white sheet up on a blank wall (or the side of your house for an outdoor "drive-in" theater) and fill the room with cushy, comfortable chairs. Get the popcorn popped and serve up your favorite movie-time candy.

Step 3: Rent a projector from Projector123.com, which will send you a **projector next-business day delivery by FedEx to any location in the United States.** Projectors123.com stocks projectors that are easy-to-use and arrive with a step-by-step guide to the set-up process. A 24-hour support line provides immediate technical assistance.
