Capable of HDTV quality, the projectors are ideal for a multitude of business and leisure uses and connect to laptops, DVD players, video game consoles, and cable or satellite TV boxes. Projector123.com customers benefit from secure online order processing and expert technical support available 24/7.

Los Angeles, CA (PRWeb) July 25, 2007 -- Now, even last-minute presentations can deliver the power and polish of professional-quality LCD projection, thanks to the swift overnight service and round-the-clock tech support of www.Projector123.com. A nationwide leader in digital projector rentals, Projector123.com is now servicing Boise, Colorado Springs, Denver and Salt Lake City with an impressive inventory of high-tech LCD projectors that meet virtually any need - from boardroom presentations to milestone celebrations.

Projector123.com puts the latest projection technology at the fingertips of business and leisure customers throughout the Mountain States, providing an affordable and stress-free alternative to the hassle of researching and investing in high-tech equipment that will soon be obsolete. And its inventory is backed by an expert staff that can help customers select the right projector and offer simple solutions for achieving high definition projection quality.

These sleek projectors deliver results far beyond the boardroom. Capable of HDTV quality, they can provide the ultimate big-screen viewing experience for a Colorado Rockies playoff game, add impact to a lecture at The University of Utah, give flair to a photo montage at a Berryhill & Co. rehearsal dinner, or turn a neighborhood block party into a memorable outdoor movie night.

Offering the ultimate ease and affordability, Projector123.com provides a choice of high-tech digital projectors with 2000 or 3000 lumens backed by technical support available by phone around-the-clock. The projectors can connect to laptops, DVD players, video game consoles, cable or satellite TV boxes, and even to digital cameras, creating nearly unlimited possibilities for use.

And the process couldn't be simpler: Visit Projector123.com, select one of two models, designate rental dates, agree to the terms and conditions, submit online payment, and wait for FedEx to arrive. Once the presentation is complete, just slip the projector back in its shipping case, replace the old shipping label with a return label provided, and drop it off or arrange for a FedEx pickup. Projectors can be shipped virtually anywhere, from a hotel or conference center to a university, wedding reception venue, home, restaurant, or any other site.

To ensure peace of mind, rentals are scheduled to arrive via FedEx one business day prior to the beginning of the rental period at no additional cost. Early delivery allows the customer time to get accustomed to the operation of the projector and to ensure it arrives as promised.

All projector rentals from Projector123.com (www.Projector123.com) are shipped in an attaché-style case that doubles as a carrying case and a shipping carton. The case is free of any branding or extraneous logos, to allow business professionals to maintain a sense of decorum and minimize distractions during the all-important presentation.

About Projector123: Projector123.com is a nationwide leader in digital projector rentals for business professionals and consumers. We understand that you only get one chance to make a first presentation, which is why we are committed to total customer satisfaction and ease of use. Projector123.com offers secure online order processing 24/7 and delivers on time, as promised. For more information, visit <http://www.Projector123.com>
